SUMMARY

I am a 4th year student at the University of Greenwich, with a focus on programming and web application development. I have solid experience and understanding of web development using Laravel. I always spend time learning and improving my skills with the goal of becoming a good and influential software engineer in the IT industry.

SKILLS

Programming Languages	PHP, Javascript, Html&Css, C#, Java
Frameworks	Laravel, React, Tailwind.css, jQuery, ASP.NET MVC
Database Management Systems	My SQL, PostgreSQL
Foreign Languages	VSTEP B2
Tools	Github
Others	Understanding of OOP methodologies, SOLID principles, have experience in deploy

PROJECTS

Real Time Message App

(06/2024 - 08/2024)

Description project	Developed an app website that enables real-time messaging, file sharing and creating chat groups.
Your team size	1
Your position in project	BE Developer
Your responsibility in project	Developed and maintained a robust and scalable real-time messaging application using Laravel and React. I set up and integrated WebSockets using Laravel Echo to ensure real-time communication between users. I also created the messaging functionality, CRUD function for group, and implemented user authentication and authorization. I designed and managed the MySQL database, ensuring data was stored and retrieved efficiently.
Technology description	Laravel, React, Tailwind.css, Socket, Axios, MySQL

E-shop ECOMMERCE

(02/2023 - 05/2023)

Description project	Built and maintained an e-commerce website facilitating seamless buying and selling of goods for users.
Your team size	1
Your position in project	BE developer
Your responsibility in project	Use Laravel framework (register & log in, decentralized between admin & user, add the product to the cart, send email after, checkout cart, search product by Ajax, product registration with upload multiple images). Create CRUD function to manager user accounts and products. Use GitHub to manage source code. Use MySQL to create and interact with the database.
Technology description	HTML, CSS, JavaScript, Laravel, PHP, jQuery, Ajax, MySQL

EDUCATION

University of Greenwich   08/2021 - 05/2025

Bachelor of Information Technology

INTERESTS

Self-study and research: Spend time every day learning and researching new technologies and industry trends.

Join the programming community: Be willing to participate in programming community activities, share knowledge and experience with other programming communities.
